

The Palliative/End of Life Care (PEOLC) Program, Alberta Health Services - Calgary Zone is currently seeking qualified Palliative Care Consultant Physicians.

Alberta Health Services – Calgary Zone includes the City of Calgary as well as a large area of south-central Alberta extending from Banff National Park to areas to the south and east of Calgary. Palliative care consultations are provided by inter-professional teams consisting of physicians, advanced practice nurses and other team members, and are delivered in a variety of service sites such as Acute Care, Homecare, Hospices, Outpatient Clinics, Rural facilities and an Intensive Palliative Care Unit (IPCU). In addition, the physicians in the Service are encouraged to apply for academic appointment in the Division of Palliative Medicine, Department of Oncology, University of Calgary. The Division is extensively involved in a program of Palliative Medicine education for medical students and rotating residents, offers a highly regarded palliative medicine residency, provides opportunities for teaching in other Faculties at the University of Calgary, and has many active opportunities to conduct research in Palliative Medicine.

Physicians who participate in the consult service group receive payment through an alternative relationship plan (ARP) that has been negotiated with Alberta Health and Wellness.

Qualified physicians will have completed the conjoint Palliative Medicine residency or equivalent education, or will have acquired several years of experience as a palliative consultant. An interest in leadership or research or education in Palliative Medicine would be an asset.

Interested physicians must be eligible for licensing in Alberta and hold current CMPA coverage. Physicians with CCFP or FRCPC will be given priority.

Please send your letter of intent, CV and three current references with your application in a confidential envelope to:

Garyda Touch
Administrative Assistant

Dr. Aynharan Sinnarajah
Medical Director
Palliative/EOL Care – Calgary Zone

Foothills Medical Center
